

## Belgium could become a new wine hotspot

*“Belgium winemaking is on the rise. Over the past 10 years, wine production in the country has quadrupled, while the quality of the final product is also increasing. This year, wine makers are expecting excellent results as well. Although the exceptionally hot summer has slightly impacted the production, the sun brings more benefits than not for Belgian wines. Source: Travel Tomorrow”*

Inderdaad !!! Dit vond ik terug op één van news-mailings uit Australië.
